

Introducing Genuine Remanufactured Kubota Parts

Kubota Reman Project

Why Be Involved?

Kubota Engine America and Engine Power Inc. are excited to inform you about a new project that is starting. We will now be offering dealers the opportunity to purchase

Reman Forms

Genuine Kubota remanufactured alternators and starters. This will allow dealers to offer their customers a lower cost alternative, while still having the quality of genuine Kubota parts. This program is for replacement parts only and should not be used on engines that are still within the engine warranty period. Each alternator and starter will come with a 12 month remanufactured parts warranty.

Testing has confirmed that Kubota remanufactured units are better quality than aftermarket parts. During our testing, an aftermarket starter failed after 3,593 starts; while a Kubota remanufactured starter still passed after 22,497 starts. The same went for the alternator when tested. The aftermarket alternator unit failed after 44 hours, while the Kubota remanufactured alternator still passed with 251 hours.

How to Get Involved?

Kubota will start with a "seeding" program. A core rebate will be offered for an interim period. Customers will be provided with a rebate form with the purchase of a "new" part. It will explain how to return a "core" for a rebate. Whoever returns the core, in satisfactory condition, will receive the rebate.

All core returns will be shipped using UPS Flexible Returns.

Reman parts are sold with a core deposit added to the sales price. The core deposit will show up as a separate line item on your invoice. Once Kubota Engine America receives the core, in satisfactory condition, the customer will then receive their refund of the core deposit.

To return the core, instructions can be found

on the core Rebate/Refund forms. All return shipments are pre-paid by KEA. KEA receives a daily shipping report from UPS to aid in tracking of returns.

Difference Between Rebate and Refund

There are two different ways to receive compensation for a core. One is a "rebate".

The rebate applies when a new Kubota factory alternator or starter is purchased. The customer may return a core and would fill out the rebate form to receive the compensation for the core.

The other type is a "refund." A refund applies when a customer has purchased a Genuine Kubota remanufactured alternator or starter.

The customer may return a core and would fill out the refund form to receive the deposit back.

Should you have any questions or would like additional information, please feel free to contact our parts department at (800) 457-7056.
